**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 12, drawn to combinatorial libraries of amines, classified in class 436, subclass 518.
  - II. Claims 13-15, drawn to process of preparing of producing an ACE inhibitor, classified in class 514, subclass 19.
  - III. Claims 16 and 17, drawn to process of preparing an amino sugar, classified in class 536, subclass 18.7+.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II and III are related as distinct products since they have different chemical structures, are made by different syntheses and are used in different processes. For example, the combinatorial libraries of Group I contain compounds of diverse structure and are used in screening, the ACE inhibitors of Group II are amino acids and useful where blockage of angiotensin converting enzyme is desirable, and the arabinosides of Group II are sugars which are typically used as chemotherapeutics.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Claims 12, 13 and 16 are generic to a plurality of disclosed patentably distinct species comprising the compounds of the working examples. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Art Unit: 1624

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
